Birdhouses with IP 227 Cameras

Our birdhouses are handcrafted and specially designed to accommodate the larger size of the IP 227 Camera.

The cameras are mounted and pre-focused to give you the best field of view

Available in Western Red Cedar or two colors of Eco-friendly 100% HDPE recycled plastic

IP 227 Wi-Fi Color Camera

- IR-Cut filter for superior color
- Infrared night vision
- iPad, iPhone, Android, Windows Mobile Compatible
- Micro-SD slot for on-camera recording
- Pre-record streaming (allows users to review what occurred in those vital moments before the camera was triggered)
- Denoise algorithm to remove the background noise to provide excellent audio quality
- Motion and Audio detection
- Uses Peer-to-Peer (P2P) Technology for easy setup for internet access from anywhere - *does not require any changes to the network router*

POE IP 227 PoE Color Camera

Able to receive both power and data using the same Ethernet cable. It eliminates the need for power outlets at the camera locations

- IR-Cut filter for superior color
- Infrared night vision
- iPad, iPhone, Android, Windows Mobile Compatible
- Micro-SD slot for on-camera recording
- Pre-record streaming (allows users to review what occurred in those vital moments before the camera was triggered)
- Denoise algorithm to remove the background noise to provide excellent audio quality
- Motion and Audio detection
- Uses Peer-to-Peer (P2P) Technology for easy setup for internet access from anywhere - *does not require any changes to the network router*

Field Monitoring of Cavity Nesting Birds

- Battery powered systems are specifically designed for short-term use to monitor remote sites without power or Internet.
- The camera can be programmed to record video or capture a photo using motion detection.
- It can also be programmed to record at intervals.
- The pictures and/or videos are stored on a removable microSD card.
- Install in your existing large birdhouse or purchase ours.

Package includes:

IP227R Camera

DC-DC Converter

6 ft. cable with battery clips*

6 ft. power extension cable

3 ft. cable with 90° end

*batteries and battery charger not included

12V 35 ah battery will run the system for 3-4 days

Solar System

- Designed in-house specifically for our IP 227 Wireless Camera
- The camera is powered by the battery which is recharged by the solar panel.
- Excess energy generated during the day is stored in the battery. This enables the camera to be used on cloudy days and at night.
- A fully charged battery will give you 3-4 days of power without sun.

- 40W 12V Solar Panel
- Terminal Block (mounted) Solar Voltage Regulator (mounted) output 12V DC
- 12V SLA Battery
- Custom Accessory Box (color may vary)
